## Sammendrag

Data & Analytics professional with 5+ years of experience delivering actionable insights and driving product development. Expert in data modeling, transformation, and integration using SQL, Power BI, and Python, with a proven track record of optimizing operations and reducing churn. Adept at collaborating with cross-functional teams, ensuring robust, scalable solutions that meet evolving business and customer needs.

## Erfaring

---

### Dataanalytiker

Completions Services

September 2023 - September 2025 - Fulltid

Stavanger

- Built and maintained 6+ real-time Power BI and Spotfire dashboards tracking drilling compliance and operational KPIs across 3 active rigs, reducing stakeholder reporting requests by ~30%.
- Developed anomaly detection logic on high-frequency sensor data, flagging 15+ performance deviations per quarter and cutting average incident response time by 2 days.
- Collaborated with engineers, geologists, and IT to translate business requirements into actionable solutions, improving operational integrity and reducing non-productive time.
- Delivered presentations to senior management on digital adoption progress, KPI performance, and continuous improvement opportunities aligned with safety, compliance, and sustainability frameworks.
- Explored predictive maintenance models on equipment trend data, identifying early-stage wear patterns that informed 2 scheduled interventions before failure.

### Data Analyst

Equinor AS

September 2023 - April 2025

- Designed, deployed, and evaluated predictive machine learning models for user churn, translating model outputs into retention strategies that reduced customer attrition by 12%.
- Applied statistical analysis and segmentation techniques to marketing and behavioral data to identify high value customer cohorts, informing campaign optimization and increasing customer acquisition and product adoption by 15%.
- Built behavioral segmentation framework grouping users into 5 distinct personas, enabling targeted retention campaigns that lifted engagement by 15% and product discovery by 15%.
- Developed predictive models and led marketing analytics initiatives that increased digital platform adoption by 30% and boosted user engagement across the organization.

## Data Scientist

Experis AS

September 2022 - September 2023 - Freelance/konsulent

Stavanger

- Designed A/ B testing framework to validate retention interventions before rollout, reducing failed campaign rate by an estimated 20%.
- Designed and deployed scalable data pipelines and ingestion workflows in cloud environments, improving data reliability for downstream analytics and modeling.
- Built automated data validation and feature preparation workflows in Python, reducing manual quality checks and enabling more consistent model inputs.
- Translated operational, safety, and compliance requirements into measurable indicators, supporting continuous improvement through data driven insights aligned with sustainability objectives.
- Integrated 5+ environmental and operational data sources into a unified pipeline, reducing client reporting preparation time from days to hours.
- Embedded predictive vessel utilization insights into a client-facing dashboard, enabling commercial teams to make charter decisions 3 days faster on average.

## Data Scientist

Esgian AS

Oktober 2021 - August 2022 - Fulltid

Oslo

Designed and implemented interactive dashboards and self-service analytic stools to support data-driven strategic decision-making across departments. Empowered stakeholders with on-demand access to critical business insights. Developed robust data models to track and analyze carbon emissions from jack-up drilling vessels, contributing to the company's sustainability initiative and environmental performance reporting. Managed end-to-end data pipelines and analytics workflows within cloud-based environments, ensuring data integrity, scalability, and timely delivery of insights for operational and environmental analysis.
